## Q1 2026 Fund Commentary

*Commentary and opinions are provided by Mackenzie Investments.*

### Market commentary

The global economy navigated a turbulent first quarter. Markets began 2026 on a positive note, with investor sentiment buoyed by continued disinflation, stable corporate earnings and expectations for further monetary easing. The outlook shifted dramatically in late February after the conflict in the Middle East escalated, and the Strait of Hormuz was effectively closed in early March, disrupting a significant share of global oil supply and raising fears of an energy-driven inflation shock.

Major central banks responded with caution. The U.S. Federal Reserve Board and the Bank of Canada both held rates unchanged at their January and March meetings. The European Central Bank postponed planned interest rate reductions and raised its inflation forecast after energy prices surged. These developments signaled that monetary easing cycles could be delayed or disrupted by the geopolitical shock.

Global equity markets declined in the first quarter, with the MSCI World Index falling about 3.5%. The U.S. market weighed most heavily on results as large-cap technology stocks retreated amid rising inflation concerns. Japanese equities benefited from ongoing corporate governance reforms. Emerging markets ended the quarter roughly flat, as higher import costs in oil-importing economies in Asia partly offset gains in commodity-exporting markets.

Gold surged to an all-time high of USD\$5,589 per ounce on January 28 as investors sought lower-risk assets amid rising geopolitical uncertainty and concerns about inflation. Prices pulled back sharply in March, closing the quarter near USD\$4,600 per ounce as conditions in the Middle East remained fluid and central bank rate-cut expectations shifted. Central-bank buying and renewed exchange-traded fund inflows supported prices through much of the quarter.

### Performance

Gold bullion prices rose during the quarter amid unusually high price volatility. An overweight allocation to selected exploration and development companies contributed to the Fund's performance.

Belo Sun Mining Corp. was a top contributor to performance. Arizona Sonoran Copper Company Inc. also contributed to performance after receiving a takeover offer.

Specific securities within the materials sector detracted from performance. Eldorado Gold Corp. detracted from performance after announcing a takeover bid for Foran Mining Corp., which the sub-advisor viewed as ill-timed and inconsistent with the company's strategy.

### Portfolio activity

The sub-advisor added Alamos Gold Inc. and Kinross Gold Corp. to the Fund based on the risk-reward profile of each name. The sub-advisor also increased Agnico Eagle Mines Ltd.

The sub-advisor sold KGL Resources Ltd. and reduced Lundin Gold Inc.
