Q4 2025 Fund Commentary

Commentary and opinions are provided by Mackenzie Investments.

Market commentary

The global economy remained resilient in the fourth quarter despite policy uncertainty and the effects of the prolonged U.S. government shutdown. Investor sentiment improved as inflation eased across major regions and expectations grew for continued monetary and fiscal policy support into 2026. Non-U.S. markets benefited from a weaker U.S. dollar and improving valuations, while Asia and Europe saw stronger earnings momentum.

Central banks maintained or extended easing cycles. The U.S. Federal Reserve Board delivered additional rate cuts in October and December, while other major policymakers signaled that accommodative policy conditions will persist. These measures helped sustain risk appetite even as global manufacturing remained soft.

Global equity markets rose. The MSCI World Index approached record levels, supported by solid earnings, broadening participation beyond U.S. mega-capitalization stocks and continued enthusiasm for AI. Emerging markets outperformed developed market peers, helped by improved sentiment, a favourable currency backdrop and stronger relative earnings trends.

Gold extended its rally in the fourth quarter. Prices peaked above USD\$4,500 per ounce in December, supported by central-bank buying, a weaker U.S. dollar and resumed ETF inflows that reinforced gold's role as the market's preferred hedge amid elevated global uncertainty.

Performance

Relative exposures to Rio2 Ltd. and Discovery Silver Corp. contributed to the Fund's performance. Rio2 stock rose as the company ramped up its Fenix gold mine in Chile. The company has a large resource base and recently added gold and copper options to its portfolio. Discovery Silver advanced its silver development project in Mexico where the government is more supportive of the permitting process..

Relative exposure to Osisko Gold Royalties Ltd. detracted from performance. Royalty companies are less exposed to higher gold prices and face the challenge of replenishing their portfolios as better financing choices become available to operators.

At a sector level, stock selection contributed to performance, as did the Fund's balanced exposure to large-, mid- and small-capitalization companies. Exposure to gold contributed to performance as gold prices rose 65% in U.S. dollars (57% in Canadian dollars). Security selection detracted from performance.

Portfolio activity

The sub-advisor added Eldorado Gold Corp. and Snowline Gold Corp. to the Fund and increased a holding in Metalla Royalty & Streaming Ltd. Harmony Gold Mining Co. Ltd. was sold and Equinox Gold Corp. was trimmed. All trades were based on the risk/reward profile of the individual companies.

Distribution of the chart, history standard and short-term reports are not permitted without including the fund profile long-term report. For money market fund reports: The current yield is an annualized historical yield based on the seven-day period ended on the date noted above and does not represent an actual one-year return. Reports produced using this website are for information purposes only. Canada Life Investment Management Ltd., and their affiliates, representatives, and third party content providers do not warrant the accuracy, completeness, or timeliness of this website or any content, and shall not be responsible for investment decisions, damages, or other losses resulting from the use of this website or its content. The only true report on unit values is the periodic statement prepared and sent by the mutual fund company. Important information about Canada Life Mutual Funds is found in Fund Facts. Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. The indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all distributions and does not take into account sales, redemption, distribution or optional charges or income taxes payable by any unitholder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated. Money market fund units are not covered by the Canada Deposit Insurance Corporation or by any other government deposit insurer. There can be no assurances that the fund will be able to maintain its net asset value per unit at a constant amount or that the full amount of your investment in the fund will be returned to you. Past performance of the funds may not be repeated. Canada Life Mutual Funds are managed by Canada Life Investment Management Ltd. The funds are distributed by Quadrus Investment Services Ltd., IPC Investment Corporation, and IPC Securities Corporation, and may also be available through other authorized dealers in Canada.
