## Q4 2025 Fund Commentary

*Commentary and opinions are provided by Mackenzie Investments.*

### Market commentary

Canada's economy showed signs of strain in the fourth quarter as U.S. tariffs and weakening trade flows continued to pressure manufacturing and export-oriented sectors. Business confidence softened, and labour-market momentum faded, although household spending remained stable heading into year-end.

The Bank of Canada held its policy rate at 2.25% in December following its 25-basis-point rate cut in October, citing moderating inflation and persistent economic uncertainty. Canada's unemployment rate rose to 6.8% in December, as labour-force growth outpaced hiring and trade-sensitive industries showed renewed weakness.

The Canadian fixed income market delivered modest gains in the fourth quarter given easing inflation and a stable policy stance towards the end of the quarter. The yield on the 10-year Government of Canada (GoC) bond ended December at 3.43%, up from 3.18% at the beginning of the quarter. Government bond prices moved lower and underperformed corporate bonds, which gained. High-yield bonds also rose, supported by the late-year rally in equities and investor demand for carry in a lower-rate environment.

### Performance

Relative exposure to Enbridge Inc. (5.375%, 2077/09/27) contributed to performance as corporate bond spreads narrowed. Enbridge remains a core Fund holding given its predictable cash flows. Despite the subordinated nature of Enbridge's debt security, the sub-advisor sees asset coverage and ample equity cushion. A holding in GoC (2.75%, 2055/12/01) bonds detracted from performance as longer-term yields increased.

At a sector level, exposure to corporate bonds contributed to the Fund's performance. Exposure to government bonds detracted from the Fund's performance.

### Portfolio activity

A holding in Sunoco LP (4.375%, 2029/03/26) was added to the Fund to replace a holding in Parkland Corp. Sunoco is one of the largest independent fuel distributors in the Americas and a leading operator of energy infrastructure. The investment reflects the sub-advisor's positive outlook for the credit following Sunoco's announced acquisition of Parkland in a transaction valued at approximately US\$9.1 billion. The Fund's holding in Parkland (4.375%, 2029/03/26) was sold given the acquisition.

The Fund's holding in Maya SAS (7.0%, 2032/04/15) was increased as the company benefits from a diversified service offering and market share growth. The sub-advisor has a positive view of the credit, supported by stable recurring revenues, improving credit metrics and competitive positioning. A holding in Cenovus Energy Inc. (3.5%, 2028/02/07) was reduced to help Fund rebalancing.
